📄 STATEMENT

As an experienced developer, I am well-versed in a multitude of languages. I have been one of the core developers, in one of the leading B2B e-commerce solutions in Europe, a web-app running and used by thousands of customers on the daily. Building on this experience, I have transitioned to developing an internal microservice project, built to support the internal ordering systems of large organisations. Subsequently, using the knowledge from studies I have been able to expand and use my expertise in 3D technologies. I have applied this expertise to develop tools and pipelines that assists internal users in their day-to-day work.

📁 WORK EXPERIENCE

Senior Software Engineer, IKEA Marketing & Communications AB

2023-09 – present
Älmhult, Sweden

- C++ Development on critical, performance heavy workloads in asset pipeline.
- Using C++ for inter-op development with the 3DSMax SDK and Python.
- Utilizing modern C++ standards for internal development, 21 and 23.
- Developing integrated tooling for multiple 3D DCCs, such as 3DSMax, Maya, Blender, Deltagen and Solidworks.
- Part of developing, architecting and managing a vast network of 3D pipelines generating renders of internal articles and delivering them to content-flows within the organisation.
- Development in Python, using PyQt, Pymxs, FastAPI, Poetry and more.
- Writing services in Rust using rocket.rs, connected to Camunda. Orchestrating 3D pipelines and workflows.
- Utilizing packages like serde, tokio, envy, schemars in Rust.
- Managing API gateways on Azure between different business functions.
- Using NoSQL solutions (MongoDB) to organize large datasets connected to 3D articles.
- Deploying product environments using Openshift/OCP.
- Developing CI/CD pipelines for applications to deploy web apps and functions with Azure Devops.
- Linux Foundation manager for the IKEA organisation, assisting with merge requests for ASWF MaterialX repository.

Senior Software Engineer (Consultant role), IKEA Marketing & Communications AB

2022-01 – 2023-09
Älmhult, Sweden

- Lead developer on a microservice used for handling orders between their planning and production branches. Using modern Java. 17 and 21 with Spring Boot.
- Deploying and managing Docker containers in K8s/Kubernetes clusters on Azure.
- Using Azure to manage, deploy and organize multiple services and databases deployed with PostgreSQL and Spring Boot.

Software Developer, Netset AB

2018-06 – 2021-12
Malmö, Sweden

- Development on the core product, a web-app running in Java 8 and 11 on Tomcat.
- Implementing solutions for payment providers in B2B e-commerce solution.
- In charge of handling communication, integration and development for 3rd party
- Setting up and developing system for SSO integration through Shibboleth.
- Development of internal and externally used APIs for importing and exporting data from and to B2B ERP connections.
- Responsible for the education of new hires in the team, teaching them the code, solution and assisting with issues for their assigned tasks.

📁 PROJECTS

Dungeon clearer, 2D game written with Unity in C#

2018-01 – 2018-06

- Case study: <https://www.diva-portal.org/smash/record.jsf?pid=diva2%3A1480406&dsid=6331>
- <https://github.com/Andy0903/Dungeon-Clearer>

Rust NES Emulator, NES emulator written in native Rust

2025-03

https://gitlab.com/JesperVa/nes_emu_rs

🧠 SKILLS

Docker | **Java** — 8/11/17/21 | **Linux** — Redhat, Arch, Debian | **Spring** | **Kotlin** | **Apache** | **C#/.NET** | **C++** — 11/14 |
Python | **Git** | **MSSQL** | **PostgreSQL** | **Azure** | **Gradle** | **Elasticsearch** | **Agile — Scrum** | **REST** | **SOAP** | **JUnit** |
Gerrit | **ORM — Netset** | **Rust** | **Microservice architecture** | **MongoDB**
